

NIPA

THATCH SYNTHETIC

A LEADER IN THE SYNTHETIC THATCH ROOFING INDUSTRY

NIPA® offers premium composite thatch roofing shingles that authentically reproduce the beauty of natural palm-thatched cottages in exotic destinations.

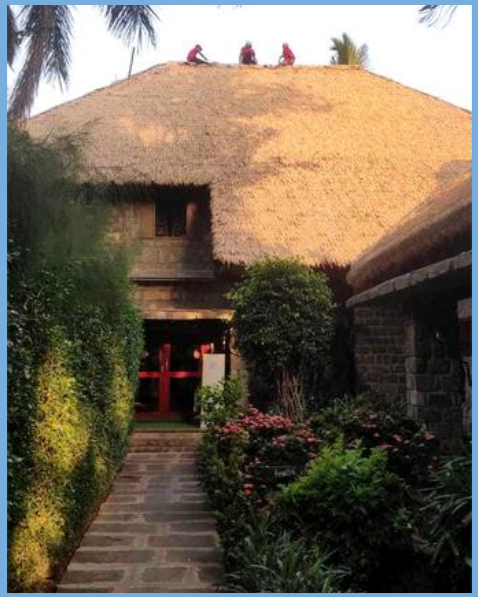

NIPA thatch stands apart in the composite roofing market: it requires no maintenance, provides independent waterproofing, and features a lifelike design backed by a 20-year warranty. Each palm leaf combines varied tones with realistic rustic textures for a sophisticated, authentic finish.

No other imitation product matches its appearance and quality.

VERSATILE | Innovative Thatch for Everyone

Ideal for small projects such as backyard palapas and DIY tiki huts, as well as large-scale applications including world-class resorts and private residences.

01. Commercial

Project: Resort, Maldives

Built to withstand intense UV exposure, fire, and harsh weather, NIPA thatch delivers effortless tropical beauty backed by a 20-year warranty. These premium shingles are ideal for resorts, theme parks,

02. Residential

Project: Private Residence, India

NIPA thatch captures the allure of natural palm leaves without the associated risks, providing a beautiful, worry-free roof for decades.

03. Do It Yourself

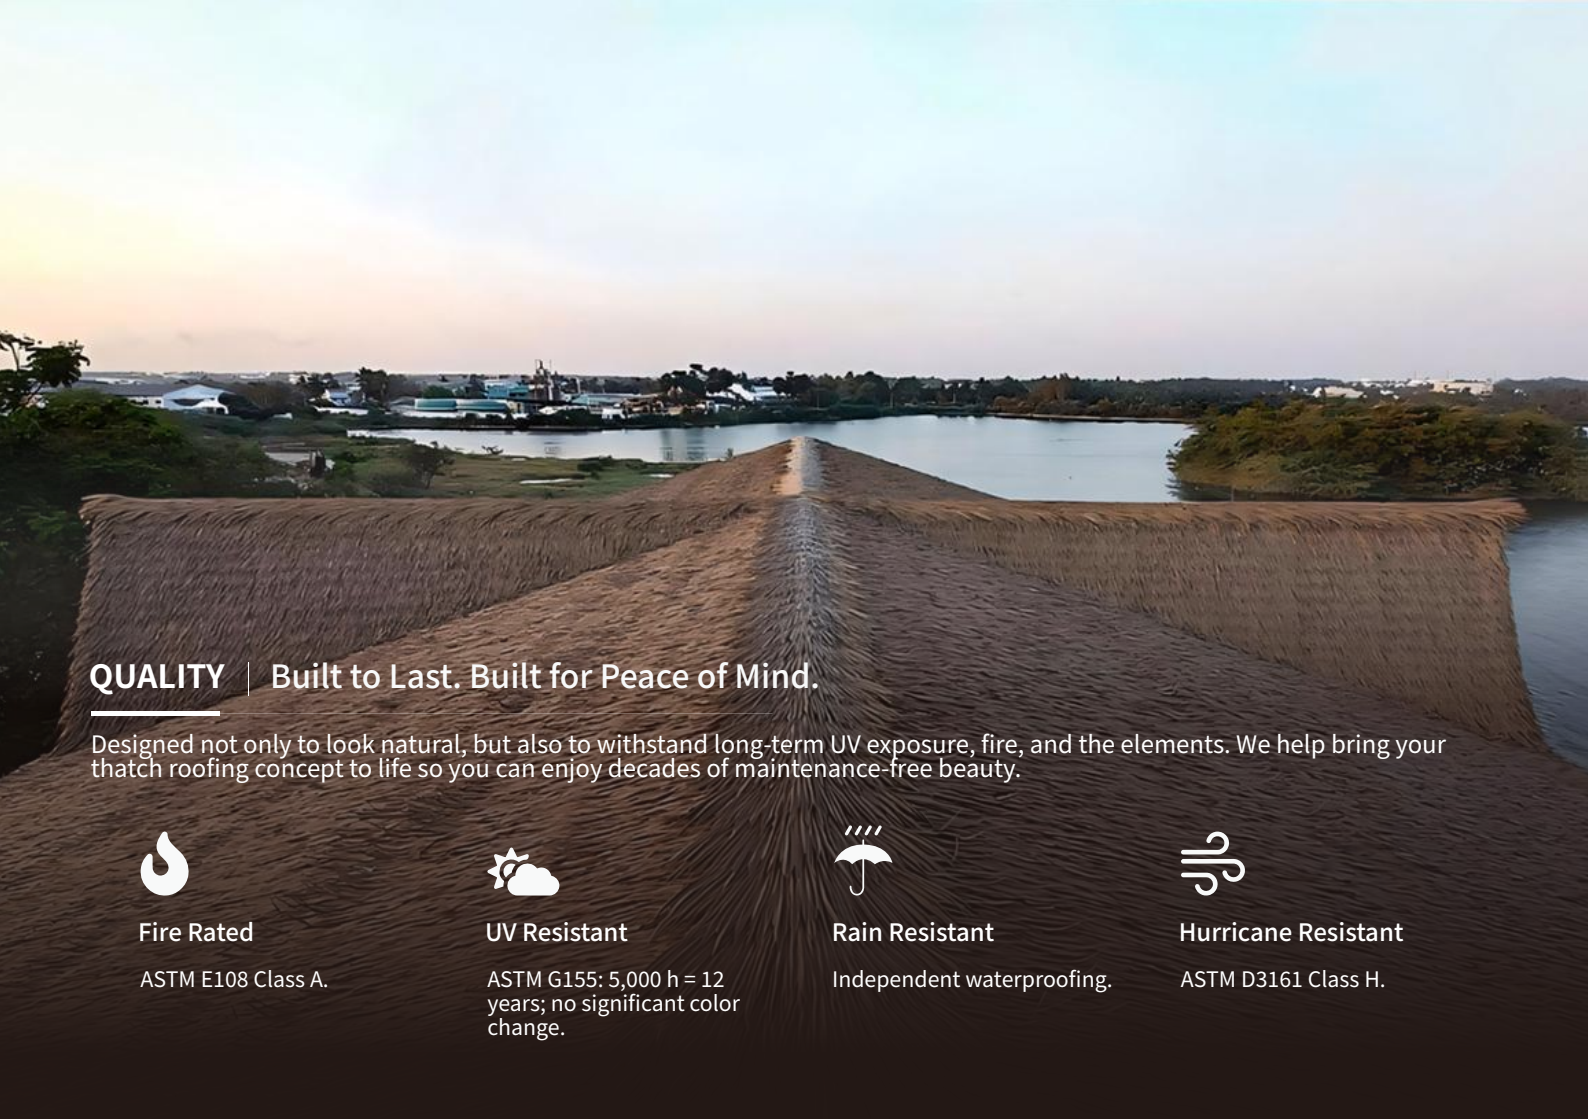

Project: DIY Tiki Hut, Australia

Easy to install, NIPA thatch shingles allow even first-time DIYers to build their own palapas or tiki huts with confidence.

WATERPROOFING | Affordable. No subdeck required.

NIPA thatch shingles are designed to adapt to virtually any roof type. They provide independent waterproofing, similar to asphalt shingles, and can even be installed directly over an open-frame structure.

QUALITY | Built to Last. Built for Peace of Mind.

Designed not only to look natural, but also to withstand long-term UV exposure, fire, and the elements. We help bring your thatch roofing concept to life so you can enjoy decades of maintenance-free beauty.

Fire Rated
